

Technical Project Manager

Do you want to build automated assembly lines with us in an international company?

Ginolis is looking for Technical Project Managers to join the Ginolis Operation team in Oulunsalo. As the Technical Project Manager your main responsibility will be being owner of delivery project content and solution, and support for the project implementation process in close collaboration between Customers, and Ginolis Sales and Operations organizations.

As the Technical Project Manager you will be responsible for communication, gathering and maintaining the project technical and financial information starting from the sales case concepting phase. As responsible for the product delivery specification your task is to ensure requirements are clearly defined and documented prior to Project move from Sales to Operations organization, and continuing through all the delivery project execution. You will participate Operations management process in the project schedule and resource plan creation and take care of the customer communications during the Project until the final acceptance at customer site.

As the Technical Project Manager you will maintain and communicate customers project schedules and delivery progress of project R&D and Manufacturing activities to all stakeholders of the company. You'll host the design reviews and project milestone meetings. You are responsible for the Project financial follow up during the delivery process.

In this role experience from automation technologies, medical devices and diagnostics products is an advantage. To be successful in this role you should have relevant experience, background and skills, like:

- Bachelor or Master of Science in relevant technical area.
- + five years' experience of project management in system or automation engineering projects.
- Team leading skills (supervision, delegating tasks, resolving conflicts, setting goals, and evaluating performance).
- Self-motivated, proactive, persistent and result oriented team player, good interpersonal skills.
- Good communication and documentation skills, ability to run and finalize things to the last goal.
- Fluent written and spoken English (Finnish appreciated also).
- Ability to travel internationally (5 -10 % of time).
